# INTRODUCTION

Buzz Coin (\$BZZC) is a community-driven meme token built on the BNB Smart Chain (BEP-20). Inspired by the power of collective buzz and online communities, Buzz Coin aims to create a sustainable ecosystem with real utility—combining the fun of meme coins with practical features like staking rewards, auto-liquidity, charitable contributions, and strong anti-manipulation safeguards.

The total supply is fixed at 10 Trillion \$BZZC tokens, with a fair distribution designed to reward long-term believers, support marketing and development, and build a self-sustaining DeFi ecosystem.

## VISION

To become the most trusted and community-centric meme token on BNB Smart Chain, where holders benefit from automated rewards, transparent tokenomics, and a renounced ownership model.

## MISSION

- Provide a safe and fair launch environment with anti-whale and anti-bot protections.
- Build a loyal community through airdrops, staking, and ecosystem grants.
- Contribute to charity and environmental causes with a dedicated 5% fund.
- Ensure liquidity is locked and team tokens are vested to prevent rug-pulls.

# Tokenomics

## TOKEN DETAILS

<b>Token Name</b>	<b>Buzz Coin</b>
<b>Symbol</b>	<b>\$BZZC</b>
<b>Token Type</b>	<b>MemeToken</b>
<b>Blockchain</b>	<b>Binance Smart Chain (BSC)</b>
<b>Standard</b>	<b>BEP-20</b>
<b>Total Supply</b>	<b>10,000,000,000,000 (10 Trillion)</b>
<b>Decimals</b>	<b>18</b>
<b>Contract</b>	<b>0x0CecfC31cCeAcB8f6dff0298796 e7D0586ddfDaa</b>

# Tokenomics

## INITIAL DISTRIBUTION

### Presale

**20%**

**2 Trillion BZZC**

Early supporters and liquidity generation

### Liquidity (Locked)

**20%**

**2 Trillion BZZC**

Added to DEX pair and locked via smart contract

### Community Rewards/Airdrop

**05%**

**500 Billion BZZC**

Airdrops, contests, community growth programs

### Marketing

**10%**

**1 Trillion BZZC**

Exchange listings, influencers, advertising

### Staking Rewards

**05%**

**500 Billion BZZC**

Distributed over time to stakers

### Team & Advisor

**05%**

**500 Billion BZZC**

Locked with 6-month cliff + 1-year linear vesting

### Reserve Fund

**05%**

**500 Billion BZZC**

Future developments, CEX liquidity, emergencies

### Charity / Ecosystem

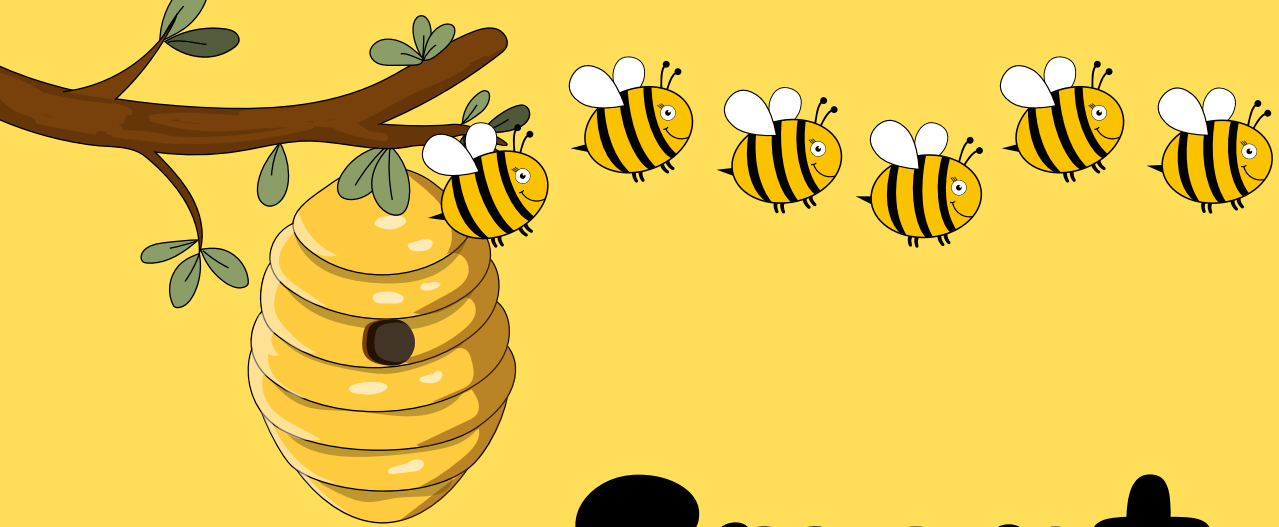

**05%**

**500 Billion BZZC**

Donations to approved charities & ecosystem grants

**Liquidity Lock** – The initial 20% liquidity pool tokens are locked inside the contract using a built-in locker mechanism, ensuring they cannot be pulled early by any party.

**Open Market** – Rest of 25% tokens across decentralized exchanges

# Smart Contract Features

The \$BZZC contract incorporates the following key mechanisms:

## Buy / Sell Tax (3–5% Range)

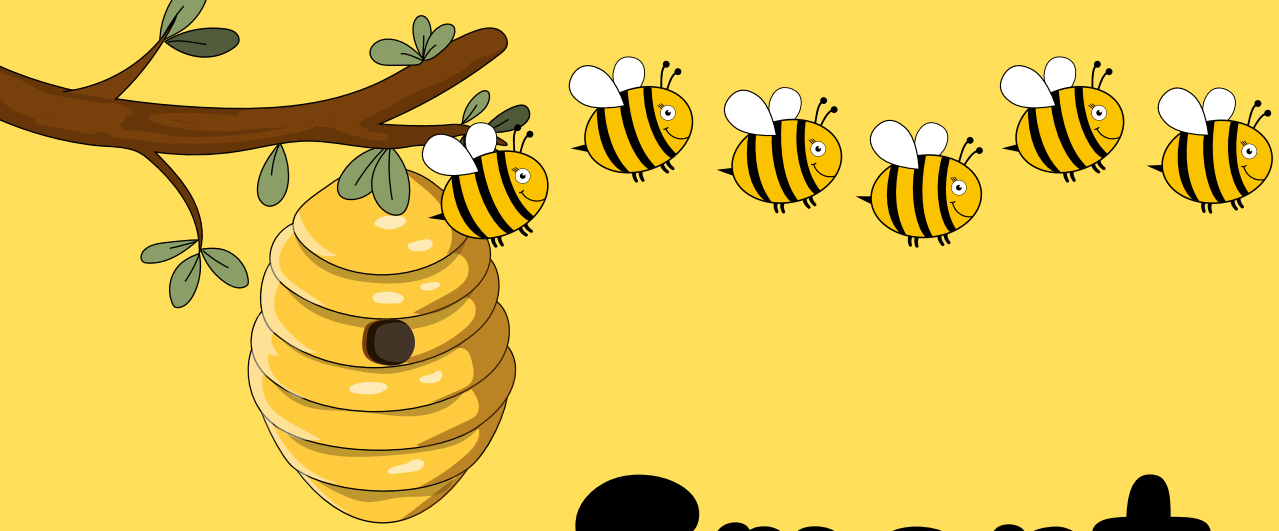

- Buy Tax: 4% (configurable between 3% and 5% before ownership renunciation).
- Sell Tax: 5% (configurable between 3% and 5%).
- The collected tax is split automatically:
  - 20% → Added to liquidity pool (auto-liquidity mechanism).
  - 40% → Sent to marketing wallet.
  - 30% → Sent to charity / ecosystem wallet.
  - 10% → Permanently burned (deflationary effect)

## Anti-Whale Protection

- Max Transaction: 0.5% of total supply (50 Billion BZZC).
- Max Wallet: 1% of total supply (100 Billion BZZC).
- Exemptions: Contract owner (initially), router, pair, marketing/charity/team wallets, and the contract itself.

## Anti-Bot Functionality

- When trading is first enabled, an “anti-bot window” prevents contract wallets from buying.
- Only externally owned accounts (EOAs) can purchase during this period.
- Blacklist function allows the team to block known malicious addresses.

# Smart Contract Features

The \$BZZC contract incorporates the following key mechanisms:

## Auto-Liquidity Mechanism

Every time the contract accumulates tokens above a threshold (initially 0.01% of total supply), it automatically:

- Swaps half of the tokens for BNB.
- Adds the remaining tokens + the swapped BNB as liquidity to the BZZC/BNB pair.
- This process is gas-optimized and locked during execution to avoid reentrancy.

## Built-in Liquidity Locker

- The owner (pre-renounce) can lock any amount of LP tokens for a specified duration.
- Locked LP tokens are held by the contract and cannot be moved until the unlock time.
- After the unlock time, the original locker (or contract owner) can claim them back.
- This provides transparency: all locked liquidity is visible on-chain.

## Team Token Vesting

- Team & Advisor tokens (5% of supply) are held in the contract.
- Cliff: 6 months from deployment – no tokens are released.
- Vesting: Linear over 12 months after the cliff.
- Team wallet can call `releaseTeamTokens()` to claim vested portions periodically.

# Staking & Community Rewards

## STAKING PROGRAM (5% OF SUPPLY)

500 Billion \$BZZC is reserved for staking rewards.

01

## CHARITY & ECOSYSTEM FUND (5% OF SUPPLY)

500 Billion \$BZZC will be deployed to support environmental and social causes.

03

## COMMUNITY REWARDS (5% OF SUPPLY)

500 Billion \$BZZC are earmarked for referral campaigns, social media contests, and community building.

02

## COMMUNITY AIRDROP

Airdrops, contests, community growth programs

04

# Roadmap

## Phase 1

Launch  
[Q3 2026]

- Deploy \$BZZC contract on BNB Smart Chain.
- Presale on a trusted launchpad.
- Add initial liquidity and lock it via the built-in locker.
- Enable trading with anti-bot protection.
- Renounce ownership after 7-14 days of stable operation.

1

## Phase 2

Community Growth  
[Q3 2026]

- Launch staking platform with 1 Trillion reward pool.
- First community airdrop (250 Billion BZZC).
- Marketing campaigns: influencers, memes, and CEX applications.
- First charity donation event (live-streamed).

2

## Phase 3

Ecosystem Expansion  
[Q4 2026]

- Release Buzz Games – play-to-earn mini-games using \$BZZC.
- Bridge to other chains (Ethereum, Polygon) via native bridge or wormhole.
- Listings on top-tier centralized exchanges.
- Second round of community rewards (250 Billion BZZC).

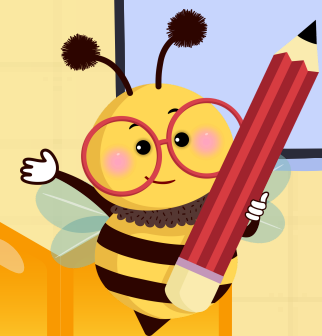

3

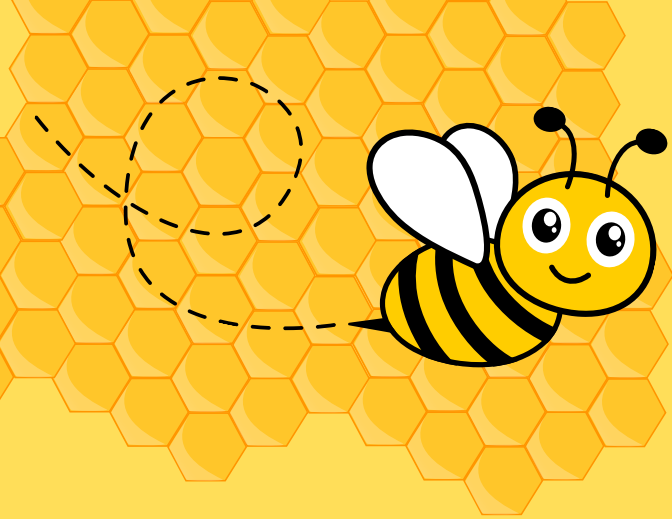

## Phase 4

Full Decentralization  
[2027]

- Transition charity and ecosystem fund control to a DAO.
- Multi-sig treasury for remaining reserve funds.
- Partnerships with major DeFi protocols for \$BZZC utility (lending, liquidity mining).
- Ongoing automatic burns from transaction taxes.

4

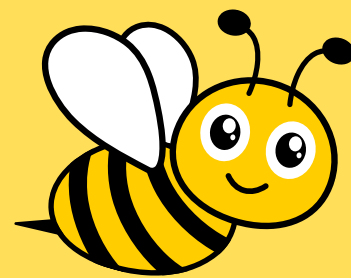

# Security & Audits

- **Solidity Version:** 0.8.27 with built-in overflow checks.
- **Reentrancy Guard:** Used in all external functions that transfer tokens.
- **OpenZeppelin Libraries:** Standard, audited ERC20 and Ownable implementations.
- **Renounced Ownership:** After renouncement, no privileged functions remain.
- **Planned Audit:** A third-party audit will be performed before trading goes live, and the report will be published publicly.

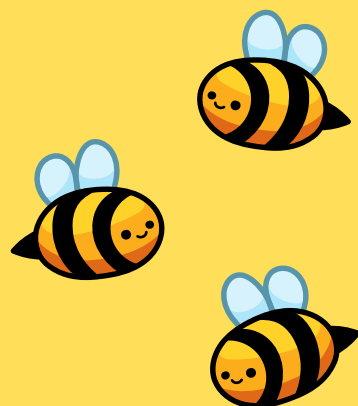

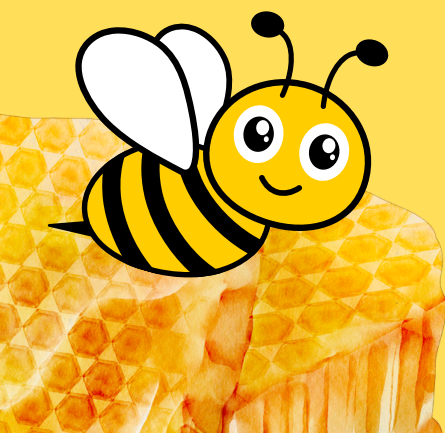

# Risk Disclosures

- Meme tokens are highly volatile, invest only what you can afford to lose.
- Taxes on buy and sell orders may reduce short-term trading profits.
- While ownership is renounced, the initial team retains control until that moment – trust is required during bootstrap phase.
- The anti-whale limits may be adjusted before renouncement, but after renouncement they become immutable.

# Conclusion

Buzz Coin (\$BZZC) is more than a meme token it is a complete ecosystem designed for longevity, fairness, and community empowerment. With a balanced tokenomics model, automated liquidity, anti-abuse protections, and a clearly defined vesting schedule for the team, BZZC stands out as a trustworthy project in the often-wild world of meme coins.

**Join the hive, and let's create some buzz!**
